

Where to Get Treatment/ Drugs/ Supplements

What to do if you are not sick but want to have medicine in your house.

1. You can get Hydroxychloroquine/Ivermectin online through www.AFLDS.com or www.DrStellaMD.com. **I am a proud member of the America's Frontline Doctors, but am not a practicing physician with them. I do not have anything to do with the service for prescribing medications through them.** So, if you have any issues- because they are getting swamped--please contact them again. I am unable to intercede or help.
2. You can also go on-line to pharmacies from outside USA. Just search for "Ivermectin on line" or "hydroxychloroquine on line without a prescription". I use GrantPharmacy.com and appreciate their diligence in helping clients. But there are other sites, so use your judgement.
3. For protocols go to www.c19protocols.com, or you can review them at this site under the tab: "Protocols for Using Hydroxychloroquine and More". Print out the protocol you want in case of power or internet failure.
4. For me, here is how I do prophylaxis. If I am going to be on a plane or traveling, or I think I've spent time in close contact with a vaccinated person I will take Ivermectin .3 mg/kg/day. on day 1, and on day 3 and repeat weekly if still in a high risk environment.
5. Treatment of actual COVID disease is trickier, but if a person gets it early within 5 days mostly it can be snuffed out with either Ivermectin daily for 3-5 days at doses in the protocols, or Hydroxychloroquine, 400 mg twice a day the first day then 200 mg twice daily for 5- 14 days.
6. You Can Get the necessary Supplements at my site---- www.TheMedicalRebel.com under the "Store" tab. We only carry pharmaceutical grade supplements. Or you can search your local health food store. I designed the Immune Stack for vaccinated and unvaccinated. See details on the shop site.
